Septage Disposal Fees

The City of Griffin provides Septage acceptance at the Potato Creek Wastewater Treatment Plant. This rate has not been adjusted with the Wastewater rates in the past. Due to the cost of treatment, we find it necessary to adjust accordingly. Formulation has been comparable fee similar to our wastewater customers.

Thus, it necessary to increase septage rates to account for the cost of handling and treatment. As you are aware, concentration of BOD is a rate of ten times that of normal septage by the daily residential use:

Therefore , effective July 1, 2008 the rates will be set for Septic Tank Haulers at \$285.00 per truck load (per ticket) and the Port –A- Potty Haulers billing rate as per ticket 50.00 Minimum charge 0 Gals – 500 Gals = \$50.00 and 501 Gals – 1000 Gals = \$100.00

Please utilize these prices as you do business with your customers.
