

SECURE YOUR LOAD IT'S THE LAW

Trucks carrying unsecured loads dump litter onto City and County roads every day. Follow these tips to ensure that your loads are secure.

- When using any vehicle or trailer to haul material, always take a few minutes to inspect the load.
- Tie down with rope, bungee cords, netting, or straps. Tie large items directly to your vehicle.
- Consider covering the load with a sturdy plastic, canvas tarp, or a net.
- Lighter goes lower. Put lighter weight items at the bottom of the load.
- Don't Overload. Keep material level with truck bed or trailer unless tied down, netted, or tarped.
- Always double-check your load.

We all share a responsibility to keep the streets and roads of Griffin-Spalding County beautiful. You may not intentionally litter, but if you're not securing the items in your truck or trailer, they could easily become litter.
